PREMIUM QUALITY HEMP CBD EXTRACTS

WHAT IS THE DIFFERENCE BETWEEN HEMP & MARIJUANA?
Industrial Hemp produces .3% or less THC and Marijuana produces THC levels above .3%.

WHAT IS CBD OIL?

CBD oil is a cannabis oil. Our CBD is extracted from the Industrial Hemp Plant. CBD oil and Hemp Oil are not the same thing.

WHAT DOES CBD DO?

CBD works with the body through the endocannabinoid system (ECS). The ECS regulates the body's normal homeostasis, or general state of balance.

IS CBD DERIVED FROM INDUSTRIAL HEMP AS GOOD AS CBD DERIVED MARIJUANA?

Yes

WILL USING YOUR CBD PRODUCTS SHOW UP IN A DRUG TEST?

Using any cannabis product, there is always a chance of showing positive on a drug test. Our Full Spectrum products contains .3% or less THC. We also manufacture products that contain 0% THC.

DIFFERENCE BETWEEN FULL SPECTRUM & 0% THC PRODUCTS?

CBD "isolate" is less effective than Full Spectrum Hemp Extract. Single-molecule CBD "isolate" has a narrow window of efficacy. Single-molecule CBD lacks critical secondary cannabinoids found in Full Spectrum extract. These compounds interact with CBD and THC to enhance their benefits also called the "entourage effect".

WHAT IS THE BEST METHOD OF USE OF YOUR CBD PRODUCTS?

Most of our products are designed to be taken sublingually (under tongue).

HOW MUCH CBD SHOULD I TAKE DAILY?

The recommended serving size is 1-2ml per day. Some people have to take more and some can take less.

100% Kentucky

Green Remedy CBD products are not FDA approved and are not meant to treat, diagnose, or cure any disease.
